Question

Scholarship and Practice Imagining America defines Publicly Engaged Scholarship (PES) as follows: Publicly engaged academic work is "scholarly or creative activity integral to a faculty member's academic area. It encompasses different forms of making knowledge about, for, and with diverse publics and communities. Through a coherent, purposeful sequence of activities, it contributes to the public good and yields artifacts of public and intellectual value." Please list all the keywords you associate with public scholarship:

Question

Part of our research focuses on early career professionals (faculty members, administrators, etc.), inside and outside of academe. We loosely define early career as people up to five years since completing graduate school; however, we are interested in your responses even if you graduated more than five years ago. Additionally, this contingency of participants is not currently enrolled in graduate school. Are you currently in graduate school?
