

NAME _____

7. Copy each number line below and estimate where the number 1 would be.
Explain the strategy you used for each number line.

8. For each shape below, write a fraction to express the portion of the entire shape that is shaded.

In 18–23, draw, subdivide, and shade square regions to illustrate and complete each statement. For example, the statement $\frac{?}{10} = \frac{3}{5}$ can be illustrated like this:

The illustration shows that $\frac{6}{10} = \frac{3}{5}$.

18. $\frac{3}{15} = \frac{?}{30}$

19. $\frac{18}{30} = \frac{?}{15}$

20. $\frac{1}{2} = \frac{?}{20}$
