

HOW TO ESTIMATE THE AGE OF CATTLE

You can estimate the age of cattle by looking at the teeth. Old animals with worn teeth cannot eat well and will lose condition.

How to check the teeth

 <p>Baby teeth (milk teeth): under 2 years of age</p>	 <p>2 tooth: 2 to 2½ years</p>
 <p>4 tooth: 2½ to 3 years</p>	 <p>6 tooth: 3_3½ years</p>
 <p>Full mouth: 4 years</p>	 <p>Worn: over 4 years</p>
